SUBJECT: Invitation letter for M.Sc. Rihab HAKIRI

To whom it may concern:

As the head of the Molecular Spectroscopy Group at the Institute of Physical Chemistry, RWTH Aachen University, Aachen, Germany, I'm pleased to confirm that Miss Rihab HAKIRI will be welcomed in our group for scientific collaboration from 01.03.2017 to 31.03.2017.

The timeframe of her stay has been chosen to maximize the overlap of interaction between herself and the members of my group, as well as our collaborators at the RWTH Aachen University (Prof. U. Englert, Institute of Inorganic Chemistry). During that time, she will be able to deepen her knowledge on molecular beam Fourier transform microwave spectroscopy and state-of-the-art methods in theoretical chemistry, to combine the outcome with results from X-ray crystallography.

Miss Rihab HAKIRI will be provided with sufficient supervision and research facilities for carrying out her project entitled "*Structure and dynamics of Flavors in different states of aggregation*" independently during her stay and work a publication of her results in an internationally recognized peer-reviewed Journal.

I'm very much looking forward to this collaboration which I expect to be of highest quality.

Yours sincerely,

Prof. Dr. Wolfgang Stahl
