Athens, 18. 07. 2017

Dear MSc. Tomas Hrivnak,

it is my great pleasure to invite you to visit our lab at the National Hellenic Research Foundation (Athens, Greece) for a STSM during the period 23.09-24.10.2017 in the frame of the project CM1405 "MOLIM: Molecules in Motion".

During your stay you will work on our common research topics, which involve the development and implementation of methods for the computation the vibrational contributions to non-linear optical properties in liquid solutions, as an addition to the rigorous local field model implemented in our program LORCHI. This may serve as a good introduction into your PhD studies in Bratislava, for which we may then also discuss further research directions.

With best regards,

Heribert Reis
