Letter of Invitation

February 4, 2019

Dear Mr Mellor,

herewith I invite you to visit my group at the Institute for Theoretical Chemistry at the University of Stuttgart in the course of a short term scientific mission being part of the MOLIM Cost Action CM1405. Provisionally the visit will be from February 19th until February 26th 2019. During that time we will work on the interface that allows the TROVE package to use potential energy surfaces from our database generated by the MOLPRO code.

Best wishes,
