Pisa, July 3rd 2017

Dr. Sonja GRUBISIC
COST-MOLIM STSM Coordinator

Subject: STSM, Martin Pizl

Dear Sonja,

I hereby express my support to the upcoming visit of Martin Pizl from the Academy of Sciences of Czech Republic. The visit is planned for the period 17 September – 7 October 2017. The purpose of this visit is to study the influence of anharmonicity and solvent effects on IR frequencies of Re and Ru diamine complexes in ground, excited, reduced and oxidized states. During this STSM Martin Pizl will benefit from the expertise of our group in the calculations of anharmonic frequencies and modelling of solvent effect with the expertise of Prague's group in the modeling of time resolved IR spectra.

Kind Regards,

Chiara Cappelli
