**12.04.2017**

**SUBJECT:** MOLIM STSM Invitation Letter for Miss Wildenberg

**To whom it may concern:**

As a member of the LISA laboratory at the University of Paris-Est Créteil, I'm pleased to confirm that Miss Alina Wildenberg will be welcomed in our group for scientific collaboration from 15.04.2017 to 30.04.2017.

During that time, she will learn different state-of-the-art methods in theoretical chemistry and combine the outcome with high resolution microwave spectroscopy and results X-ray crystallography.

Miss Wildenberg will be provided all necessary supervision and research facilities to carry out her project entitled "*Large amplitude motion in 2,3-Dimethylanisol – Spectroscopic, crystallographic, and theoretical characterization*" during her stay.

I'm very much looking forward to this collaboration which I expect to be of highest quality.

Yours sincerely,

Dr. Ha Vinh Lam NGUYEN
