April 22, 2018

To whom it may concern:

I am writing this letter to certify that PhD student Ms. Martina Zámečníková has my full support to visit our group in Luleå. The visit will take place from May 14th through May 24th, and she will learn our method to include resonance contributions in radiative association. She will work on the production of the molecule CO^+ , which has important implications for the chemistry of the interstellar medium. I feel confident that the work will result in a high quality publication. I have read her work plan, which I think is realistic well thought out.

Sincerely,

A handwritten signature in black ink, appearing to read 'Magnus Gustafsson', written over a horizontal line.

Magnus Gustafsson
